

Which camera driver do you need for your system?

The IDS Software Suite is available as 32- and 64-bit driver. Which driver you need depends on whether you are using a 32- or 64-bit operating system.

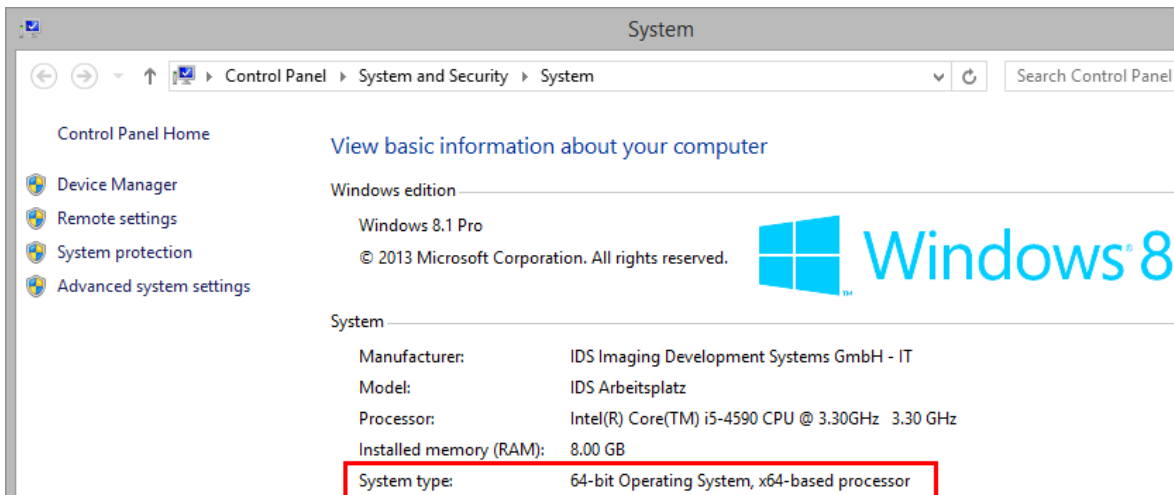

Windows

On Windows, open the system information as follows:

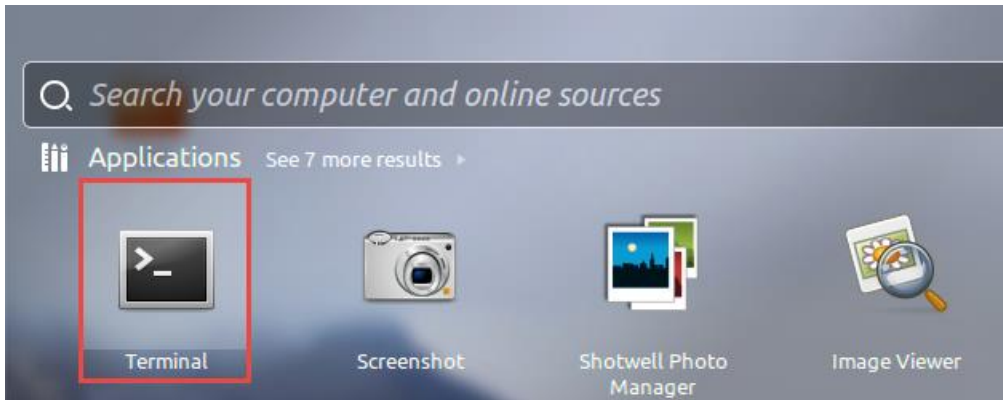

1. Click on "Start".
2. Use the right mouse button to open the context menu of "This PC".
3. Select the "Properties" entry.

In the "System" window the "System type" is displayed:

Linux

1. Open the Terminal window.
2. Enter the following command: `uname -m`
3. If the output is "i386" or "i686" you use a 32-bit system. If the output is "x86_64" or "amd64" you use a 64-bit system.
