

# IDS Vision Channel: Exclusive tour of the trade fair booth

## Visit us virtually at the world's leading trade fair for machine vision

You cannot visit us in person at VISION in Stuttgart this year? No problem, in that case we will gladly bring our trade fair innovations to you on your screen. On the IDS Vision Channel, we will present our products and stand demos simultaneously with the trade fair.

The video will be available from 5 October. To watch, simply log in to the Vision Channel section with your IDS website user account and enjoy an exclusive tour of the booth with explanations of the demo systems. For even deeper insights into the functions and possibilities of our products, you will find many other interesting videos to watch in the media library... Enjoy!
